Maiia
Vyshniakova

Software Developer

Summary

Accomplished software engineer with three years of experience in developing Roku-based channels at a Ukrainian company. Proficient in software development, high-level language programming, and Git flow. Possesses strong expertise in OTT and front-end technologies. Educational background includes two years of applied mathematics at Lviv National University and current studies in computer science at Vienna University. Adept at delivering innovative software solutions and eager to contribute technical skills to a dynamic engineering team.

Work Experience

Software Engineer 01/2021 - Present
Global Logic - Lviv

- Developed Roku channels, enhancing OTT user engagement through innovative design and functionality.
- Resolving technical issues monthly, ensuring seamless channel performance and enhancing customer satisfaction.
- Collaborated with clients to understand requirements, resulting in tailored software solutions that improved client retention.
- Implemented Git flow strategies, reducing development cycle time and increasing code quality.
- Conducted thorough troubleshooting sessions, identifying and resolving complex issues to maintain smooth running channel.

Education

Vienna

2027

Computer Science at Vienna University

- Gaining proficiency in advanced programming languages, facilitating the development of high-quality, efficient software solutions.
- Engaging in collaborative projects, developing teamwork and communication skills crucial for engineering roles.
- Enhancing understanding of algorithms and data structures, applying theoretical knowledge to practical software development challenges.
